Dear Mrs. Alfus

We are pleased to confirm that our product "Silberharz" art. no. 510100 corresponds in all chemical and physical properties to the previously purchased "Bioresin BW 05". All raw and auxiliary materials necessary for the production are purchased from the same suppliers in the same quality and purity as before. The silver content in the product is unchanged.

The silver resin is not approved for drinking water use!

Kind regards

GEBRÜDER HEYL
Analysentechnik GmbH & Co. KG

Michael Bukowski
Product manager
