

Conformity Declaration

according to REACH Regulation as of 06/2024

The new European Union regulation concerning the Registration, Evaluation, Authorisation and restriction of Chemicals (REACH) forces us, as a supplier of chemical products, to meet certain requirements during a specific time period. We wish to take this opportunity to explain this in more detail.

We currently market approximately 250 chemical products. However, these preparations consist of approximately 100 different substances or other mixtures which must be in conformity with REACH, i.e., registered with and accepted by the European Chemicals Agency (ECHA) during phase-in deadlines.

All the substances or mixtures for the production of our products are purchased within the EU. All the substances used in our products were registered before December 1, 2008. All substances requiring REACH registration were registered on August 1, 2024.
