

SVHC Conformity Declaration (SCIP)

according to REACH

Since January 2021, manufacturers and suppliers are obliged to report information on substances of very high concern (SVHC) greater than 0.1 % to the SCIP database (substances of concern in products). As a manufacturer of analytical instruments and controls for water treatment, we are a downstream user in the supply chain in the sense of REACH. We are aware of our obligations under REACH.

Our suppliers are required to report the use of products that exceed 0.1%. On the basis of this supplier information, we can confirm that the delivered products **do not contain SVHC with more than 0.1%** and are therefore not further processed by us.

However, this letter does not represent a legally valid statement. The inspection is carried out exclusively on the basis of information provided by suppliers. We ourselves do not carry out any chemical analyses to determine the substances.

This declaration is made on behalf of
